#### Fielding & Sample Specifications

- Dates: data collection should begin in June.
- Eligibility: respondents should have completed all four surveys of the ANES 2012 pre- and post- election surveys.
- $n = 1,200$  completions

#### Programming Specifications

- Missing data and nonresponse codes: Please assign a numeric code to all variables rather than using system missing. Please use the following nonresponse codes:
  - -1: inapplicable, legitimate skip. Use this code when the specified flow through the questionnaire makes a question inapplicable. For example, a "how strongly do you favor that" follow-up question would be coded -1 when the preceding answer was "oppose."
  - -4: other/error: data are missing due to a technical problem.
  - -5: breakoff; the interview was terminated before reaching this question.
  - -6: unit nonresponse. The panelist never started the questionnaire. Given that unit nonresponse refers to the entire questionnaire, -6 would be present for all of the responses or for none.
  - -7: no answer; the question was displayed to the respondent, but the R clicked "Next" without answering the question.
- Nonresponse prompting: Unless otherwise noted for a specific item, for every item to which the R fails to respond, please re-display the item once with the following text above it: We noticed that you did not answer the question below. We would be very grateful if you would be willing to provide your best answer, even if you're not completely sure. But if you'd prefer to skip this question, you can click "Next."
- Nonresponse prompt records: record whether or not the nonresponse prompt is shown.
- Variable names: Please name all item variables with "C5" (for cross-section 5) prepended to the item name. E.g. the response to the item E2 should be in a variable named C5E2.
- Codes for response options are indicated in brackets (not displayed to the respondent).
- Forward/reverse response option order: randomly assign each R to forward or reverse response option order. When response options in the question stem appear in parenthesis in both orders, randomly display only the assigned order to the respondent.
- Timing: Record all item timings.
- Merged variables to deliver with the data: include on the data file preload variables, administrative variables for survey invitations sent, administrative variables for number of previous KN surveys completed, geographic data, Census Region, metropolitan status, and all data from any profile questionnaire administered by KN including:
  - standard demographic profile (including home tenure, age, sex, age and sex of household members, parenthood status, marital status, ethnicity, race, education, employment status, occupation, income);
  - public affairs profile (including country on right track, most important problem, voter registration status, 2008 turnout and candidate choice if available, 2012 turnout and candidate choice, party ID, liberal/conservative ID, Obama attitudes & approval, interest in politics, efficacy & citizen duty items, news exposure, sexual orientation, veteran status, religious denomination, religious service attendance, civic participation, self-id as environmentalist, gun ownership.)

**[NOTE TO PROGRAMMER: ANY RANDOMIZATION WILL BE DONE THROUGH PROVIDING A LOOKUP TABLE FOR EACH VARIABLE, AS DONE IN SNO 15843]**

**[NOTE TO PROGRAMMER: AS DONE IN SNO 15843, PLEASE ALSO HAVE SCRIPT ACCOUNT FOR SPECIFIC CODING REQUIREMENTS FOR REFUSED DATA]**

[DISPLAY]

[THIS DISPLAY AND SUBSEQUENT SLIDER QUESTIONS ALSO USED IN SNO 15842]

[N0]

Please look at the graphic below.

We'd like to get your feelings toward some of our political leaders and other people who are in the news these days. We'll show the name of a person and we'd like you to rate that person using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person.

If we come to a person whose name you don't recognize, you don't need to rate that person. Just click Next and we'll move on to the next one.
