Project Code: UTEX0055f  
Project Name: Texas Tribune December  
Prepared for: Joshua Blank  
Interviews: 1200  
Field Period: December 01, 2023 – December 11, 2023  
Project Manager: Sara Sermarini, [sara.sermarini@yougov.com](mailto:sara.sermarini@yougov.com)  
=====

YouGov interviewed 1254 respondents who are registered voters in Texas. They were then matched down to a sample of 1200 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame is a subset of Texas Registered Voters from a politically representative "modeled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2020 presidential vote.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and 2020 Presidential Vote Choice. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2020 Presidential vote choice, home ownership, political identification (3-categories), and a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.
